OBJECTIVE

Software Development Engineer

SUMMARY

Currently pursuing a degree in Computer Science at a Brazilian university. Familiar with Python for backend programming and Git for version control. Continuously improving problem-solving and logical thinking. Hands-on experience in full-stack development using ReactJS and JavaScript, focusing on building responsive, efficient, and user-friendly applications. A detail-oriented and proactive professional focused on continuous learning to enhance skills every day.

EDUCATION

Bachelor's Degree in Computer Science - Estácio, completion in February 2026.

EXPERIENCE

Programming instructor at Ctrl+Play

- Guide beginners in programming fundamentals.
- Teach essential back-end and front-end tools, including Python and ReactJS.
- Supported collaboration and teamwork among students.
- Achieved over 95% student satisfaction through engaging and practical lessons.

Team leader at Ctrl+Play Hackathon

February - July 2025

- Led two teams during a 6-month, multi-stage hackathon organized by Ctrl+Play.
- Achieved 1st place with a front-end application and 3rd place in another category among 30+ teams.
- Oversaw project planning, task distribution and presentation across all stages of the competition.
- Focused on building a responsive and user-friendly front-end solution using HTML, CSS and JavaScript.

Volunteer English Translator

Magé, Rio de Janeiro

- Assisted as an English translator for the Canadian team Toronto Azzurri during the international futsal event.
- Helped facilitate communication and coordination for over 15 team members.
- Collaborated with fellow volunteers to ensure a smooth and welcoming experience for all participants.

Private English teacher

- Assisted students improve their English skills by at least 40% in targeted areas.
- Guided learners toward achieving their personal and academic goals.

LANGUAGES

English - B2 | Portuguese - Native
